Javelin™ J230iK Kiosk Card Printer

The ideal solution for adding plastic card printing and encoding capabilities to a kiosk application

The J230iK complements our range of card printers and can readily be incorporated into any self-service kiosk design. With its specially written firmware, the card can be passed through the printer to suit your kiosk application and can readily be integrated with your software.

Special features include passing mis-encoded cards into a reject hopper, presenting just part of the card to the customer to retrieve from the kiosk, and even reclaiming the card if it is not taken after a pre-determined time.

The Javelin J230iK is a reliable, compact and easy to use card printer, delivering outstanding performance at a great price. Boasting a full range of encoding options, they are an economic, reliable solution for all your on-demand card printing needs.
